The start and finish flags are already in position and at the finish on top of the hill the Smith Buildings Co. has a force of men building the timing and press stand. This will be 32 feet long, a third larger than last year. It is expected there will be a large corps of spectators from New York and various parts of the state.

Yesterday afternoon William Sheridan, chief flagman, took his position with a red flag at the bottom of the hill to warn teams whenever cars were on the hill during the official hours of practice from 1 to 3 o'clock. These hours will hold good all of the week. A large sign at the foot of the hill warns motorists that if speeding occurs on the hill at any other time those responsible will be prosecuted by the selectmen of Etnon and the Automobile Club of Bridgeport.

The Ladies of St. Mary's Parish will give the last whist of the season at the parish house on Pembroke street, Thursday evening. The hall permits a hundred tables. SUIT WITHDRAWN (Special from United Press.) New York, May 25.—The suit brought by John L. Dudley against the United States Express Company for the appointment of a receiver, was withdrawn today by the attorneys representing Dudley. BURMAN WHO MADE 102 MILES HOUR ASKS FOR ENTRY

Sport Hill Almost Ready For Annual Climb of Bridgeport Automobile Club.

Entries for the fourth annual hill climb of the Automobile Club of Bridgeport at Sport Hill, Monday, are coming in this week with a rush. Last night Chairman Sperry of the contest committee received a telegram asking will a place be held for Robert Burman, the famous racing driver of the Buick car and the man who has done such remarkable runs with the Buick at Ormond, New Orleans and elsewhere, going 102 miles in an hour at Ormond. The dispatch said that a carload of Buicks would accompany Burman from Chicago.

Charles Singer, president of the Palmer & Singer Co., of New York has entered a 60 H. P. Palmer & Singer car in the free-for-all and will drive it himself. Bell Brothers of Stamford have entered two Columbia cars and Coffey, the well known racing driver for the Electric Vehicle Co., will be the pilot. Two Kissel cars, one of 60 h. p. and one of 30 h. p. have been entered so also have two air cooled Camerons, a Speedwell and an Allen-Ington.

An entry has been made by the Bristol Engineering Co. of Bristol Conn. It is understood they will send down one of the big 60 h. p. Buick cars to compete with some of the better known makes. Everything looks rosy for a large and attractive list of entries. The list was announced to close today but because of the large number of inquiries and requests it will be held open for several days longer.

Yesterday the Automobile Club of Bridgeport made arrangements for parking spaces for its members upon the lot directly opposite the timing and press stand at the finish, and also south of the stand on the same side of the road. These spaces are the choice of Sport Hill and the club has made a large reservation. These spaces can be engaged of Assistant Secretary H. M. Lyon at the office of the Automobile Club of Bridgeport. They will be apportioned off in rotation as applications are received. Each applicant will receive a numbered ticket with a race flag at the bottom of it. Applications can be made at once.

Several officers of the Automobile club inspected the course yesterday afternoon and found that the timing and press stand at the bottom of the hill has been filled up and there will be less room for the cars strike the bridge. Further up the hill the road has been widened considerably. The club is doing everything possible to make the course ideal.

The start and finish flags are already in position and at the finish on top of the hill the Smith Buildings Co. has a force of men building the timing and press stand. This will be 32 feet long, a third larger than last year. It is expected there will be a large corps of spectators from New York and various parts of the state.

COTTAGERS GRATEFUL TO HYDRAULIC COMPANY

Great changes are taking place on the beach. "Little Danbury", once the Mecca, finds its supremacy challenged by a string of cottages to the right—more to come, for the Bridgeport Hydraulic Company has consented to extend its water main some quarter of a mile or more westward. This means a rapid development of that part of the shore. It also means to many Fairfield citizens an increased income, as more farmers are finding a quick market for all they have to sell, while grocers, butchers, livermen and others will have an already considerable trade much increased. The Water Company is doing an unusually generous thing in this extension of mains. It has suffered so severely from electrolysis along shore that thus far furnishing the beach with water has been a losing game; yet, though there is but scant prospect of profit to them in this extension, the company magnanimously extends this courtesy to the village of Fairfield whose citizens are its patrons in other sections of the town. Another great improvement to the beach is the new road. Under the energetic supervision of First Selectman Charles Fox it has taken long strides toward completion. A quick market for all they have to sell, while grocers, butchers, livermen and others will have an already considerable trade much increased.
